Although your history and symptoms are very important in our analysis of your condition, it is also important for us that you understand:

- An Allergy is NOT a disease. It is nothing more than your body reacting inappropriately to what should be a harmless substance, consequently activating the body's natural defense mechanism in the form of symptoms.
- A symptom is an attempt by your body to tell you that something is wrong.
- We will be treating the cause of your allergy.
- We do not use medications in this program.
- Our procedures are safe, painless and effective for people of all ages.

Briefly describe the reason for your visit and what you hope to accomplish:

What type of care are you looking for?

Temporary Relief

Maximum Recovery
